[Publix installs EV chargers](#)

Publix Super Markets has installed its first electric vehicle charging station in Nashville at its Hill Center at Belle Meade Publix. The Eaton Pow-R-Station is a Level 2 charger. It is located in the parking garage at the Hill Center, visible from the outdoor parking lot and the elevator.

Publix is participating in [ECotality's EV Project](#), which is testing electric vehicle charging infrastructure by installing stations in selected cities around the country, including Nashville.
